

# ESGE DAYS 2021 TRACK HIGHLIGHTS FOR COLON AND SMALL BOWEL

“ The joint WEO-ESGE session is a must for everyone interested in colorectal cancer screening. Young stars will be presenting ground breaking research on faecal immunochemical testing, and worldwide leaders will be giving overview of global CRC screening status.

The guideline session on endoscopic management of hereditary CRC syndromes is for everyone who wants to be up-to-date with the best clinical practice. If your heart rate goes up only in case of emergency or extreme endoscopy please visit Extreme Video Session II and Meet the Expert for Prevention and Management of post-EMR bleeding in the right colon. The Pitfalls session is a must for all members of the endoscopy team because difficult situations require team work. Finally, if your eyes look to the future of colonoscopy, join us for the free paper session on innovations and developments in AI in the colon. ”
