

ESGE DAYS 2021 TRACK HIGHLIGHTS FOR ERCP

“ Anyone whose particular interest is ERCP will have a packed schedule at ESGE Days 2021. Of course I hope everyone can join the opening of our congress with the Plenary session, where the best abstracts will be presented. Then, I’m looking forward to the guidelines session Thursday on biliary stenting, where an expert panel will discuss the highlights of the recent ESGE guidelines, including a case illustration. The Pitfalls in EUS / ERCP session is a must for all members of the Endoscopy team given the unique focus on errors we all risk making. On Friday, the live endoscopy session obviously must be attended, offering basic, as well as cutting edge techniques demonstrated by experts. Finally, if you can fit in any post graduate sessions I would recommend the session on ERCP in altered anatomy. So – be there! ”

Professor Lars Aabakken

Head of GI Endoscopy, Oslo University Hospital, Norway and ESGE Scientific Committee ERCP working group chair
