

ESGE DAYS 2021

TRACK HIGHLIGHTS FOR EUS

At ESGE Days 2021 we'll have worldwide EUS leaders and young stars presenting up-to-date topics on the main EUS fields and groundbreaking research. There'll be 3 EUS and EUS/ERCP Guideline sessions on Thursday so be sure to catch one. The EUS cookbook session and the Case session ERCP/EUS: Malignant hilar strictures both also promise to be very interesting. To hear about the latest developments in advanced diagnostic EUS techniques catch Extreme IV - EUS guided interventions. Finally, fit in the postgraduate course at any time during the Days and after and follow four EGEUS-ESGE joint courses highlighting several EUS issues from basic to advanced topics. Also in the EYE Zone you will have the chance to meet and discuss with many EUS experts. See you online at one of these sessions!

Professor Claudio Giovanni De Angelis
