

# ESGE DAYS 2021 TRACK HIGHLIGHTS FOR UPPER GI

At ESGE Days 2021 I'm looking forward to the Guideline session where the endoscopic management of achalasia and gastroparesis will be discussed. The Pitfalls session is a must for all endoscopists because it will improve the yield of your diagnostic upper endoscopy, and provides valuable practical tips on RFA and esophageal stenting. Another must is the Case session on Upper GI: Duodenal polyps because excellent speakers will discuss the management of ampullary as well as non-ampullary polyps and how to prevent complications. Finally, if you can fit in any post graduate sessions I would recommend the Upper GI: Barrett's Oesophagus course. Join us there!

#### Professor Bas Weusten

Department of Gastroenterology and Hepatology at St Antonius Hospital Nieuwegein and UMC Utrecht, The Netherlands.

ESGE Scientific Committee Upper GI working group chair.
